## UCO Version 0.5.0 Release Notes

## Focus:

UCO Version 0.5.0 is primarily focused on the removal of the investigation namespace from UCO (that namespace now resides in the CASE ontology) and on the renaming of several classes (Observable subclasses, Facet subclasses) in the observable namespace and a single property (core:facet) to support improved alignment with the CASE ontology and the forthcoming addition of ObservableObject subclasses.

## **Focus Exceptions:**

Changes (these are changes to ontologies, classes or properties in the preexisting ontology)

Breaking Changes (these are changes to ontologies, classes or properties in the preexisting ontology that make the new release non-backward-compatible)

- uco-observable: modified the class name of observable: Cyberltem to be observable: ObservableObject Issue OC-7
- uco-observable: modified the class name of observable: CyberAction to be observable: ObservableAction Issue OC-7
- uco-observable: modified the class name of observable:CyberRelationship to be observable:ObservableRelationship Issue OC-7
- uco-observable: modified the class name of observable:CyberObservablePattern to be observable:ObservablePattern Issue OC-7
- uco-core: modified the property name of core:facets to be core:hasFacet Issue OC-58
- uco-observable: renamed the Facet subclasses within the observable namespace by appending "Facet" to the end of each subclass name - Issue OC-57

Range Changes (these are changes to the "range" of a property that are not breaking changes: typically these are broadening in the scope of the range)

Changes (these are general changes to the preexisting ontology that are not breaking or range changes)

Deprecations/Deletions (classes or properties that were deprecated from the ontology)

- uco-investigation: removed the Investigation namespace (investigation.ttl and investigation-da.ttl) from the UCO ontology Issue OC-6
- uco-master: removed the Investigation namespace (investigation and investigation-da) imports Issue OC-6

## Additions

Class Additions (classes that were added)

Property Additions (properties that were added)

Vocabulary Additions/Changes (vocabularies that were added or modified)

**Annotation Changes**
